

Emission reduction technology distributed by Univar

In collaboration with Viscon USA, a leading manufacturer of innovative fuel additives, Univar is pleased to announce the launch of a groundbreaking, multi-purpose **clean fuel additive** in Europe - **Viscon™**.

In light of ever stricter emission standards such as EURO VI and MARPOL, growing public concern about the negative health effects of exhaust fumes and increasing pressures for sustainability from the industry, **Viscon™** offers a unique and cost-effective way of making a difference by significantly **reducing emissions**.

One network. A world of solutions.

Viscon™ is a fuel blending component for diesel, gasoline and heavy fuels which **improves combustion**, resulting in **emission reductions** at very low implementation costs.

This revolutionary technology, it's not just the only certified fuel technology to **reduce PM, CO₂ and NO_x simultaneously**, it is also incredibly safe and easy to implement.

Benefits

- › Reduces harmful emissions
- › Improves combustion
- › Improves fuel efficiency
- › Improves air quality

Effects

- › Increases spray penetration by creating more uniform droplet sizes
- › More homogeneous air/fuel dispersion
- › Lower peak temperatures and faster flame propagation
- › Uniform and complete combustion of the fuel

Technical Overview

- › Based on Polyisobutylene (PIB) polymer
- › Ultra high molecular weight, pure hydrocarbon polymer
- › Safe for all grades of gasoline, diesel and heavy fuel
- › Reduces maintenance costs through cleaning effects
- › Intended for and is safe for continuous use

Compound (emissions)	Reduction	Certificate	
PM (Particulate Matters)	From 25% to 49%	Tier II CARB verified	California Air Resources Board
NO _x (Nitrogen Dioxide)*	Up to 20%	OEETC	Olson-EcoLogic Engine Testing Laboratories
CO (Carbon Monoxide)	Up to 38%	OEETC	Olson-EcoLogic Engine Testing Laboratories
HC (Hydrocarbon)	Up to 29%	OEETC	Olson-EcoLogic Engine Testing Laboratories
CO ₂ (Carbon Dioxide)	Up to 2.5%	OEETC	Olson-EcoLogic Engine Testing Laboratories

*Approved by Texas Commission on Environmental Quality (TCEQ)
